

The tools and files needed to read your monitor's EDID are provided and included in the package.

Step 1: Open the tools in the package to install

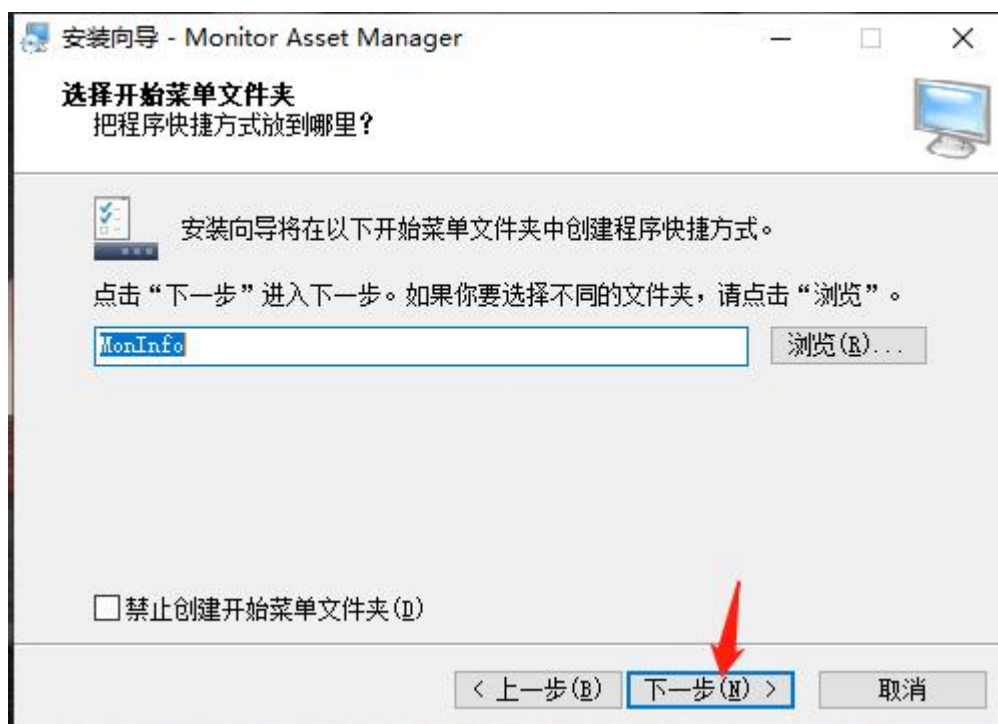

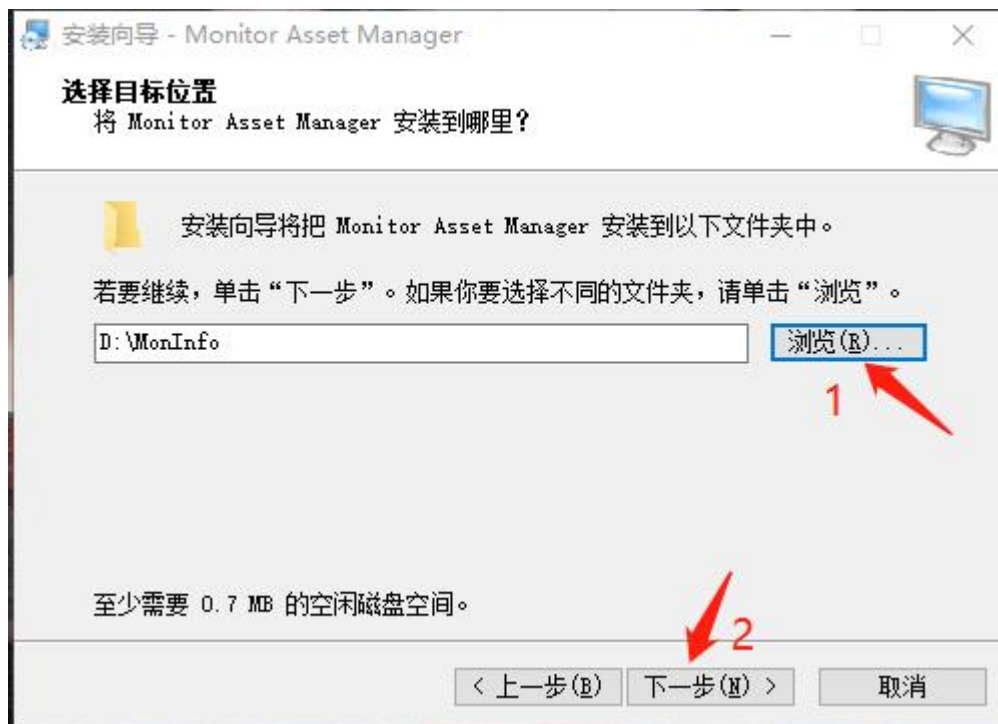

Step 2: Running the tool in preparation for installation, please click on the locations marked in the screenshot in turn.

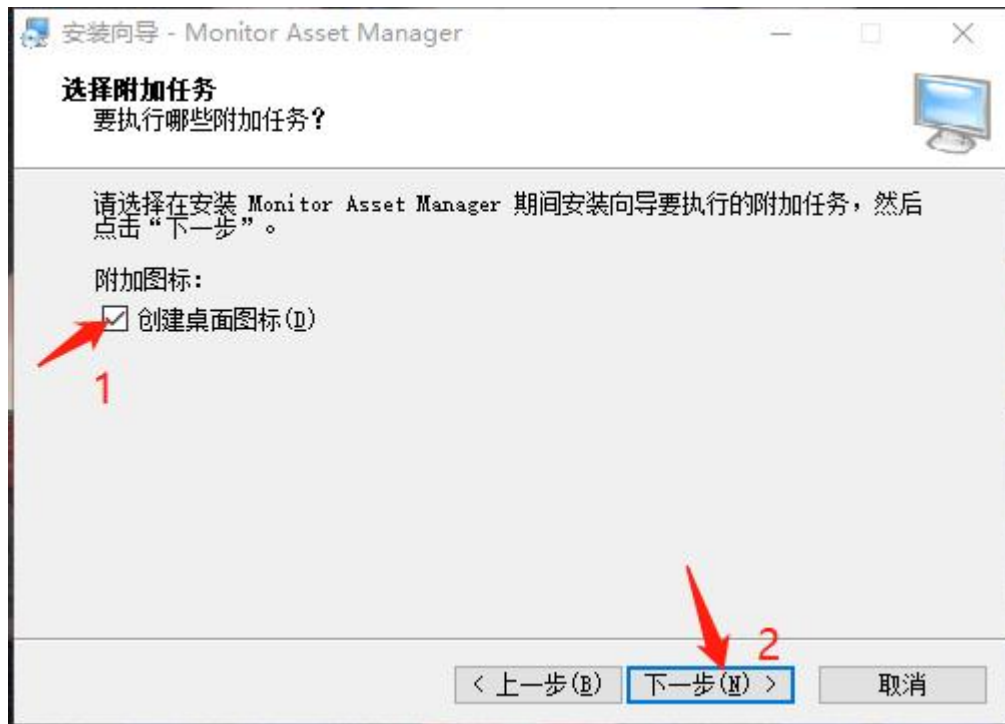

Follow the numbers marked in the screenshot, do the first step first, then the second step.

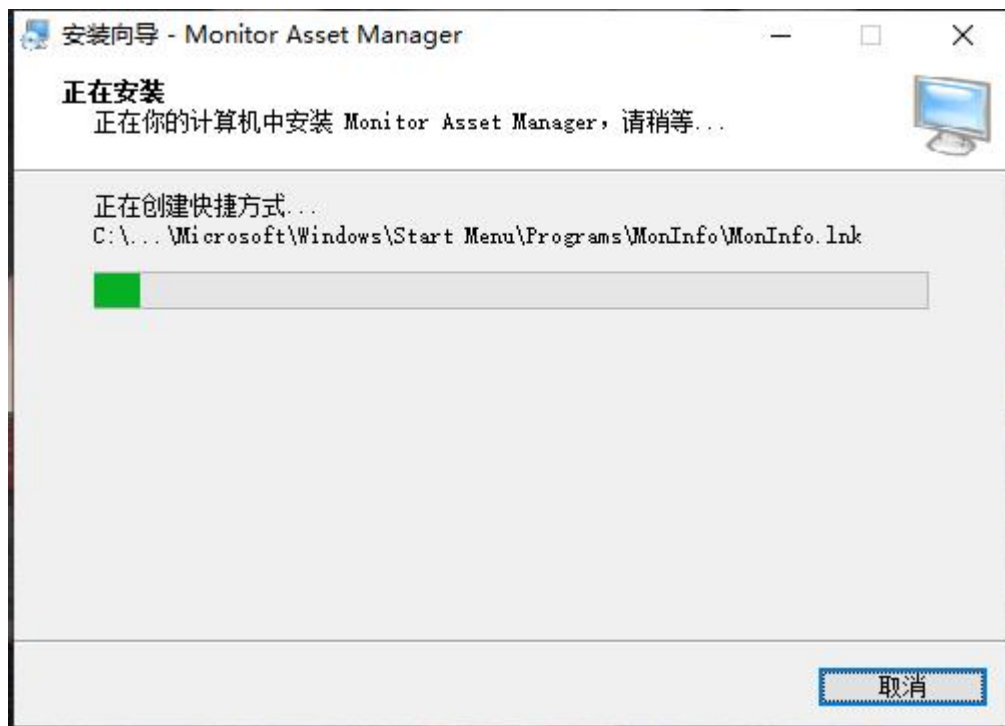

The following step is to select the location where you want to install the tool.

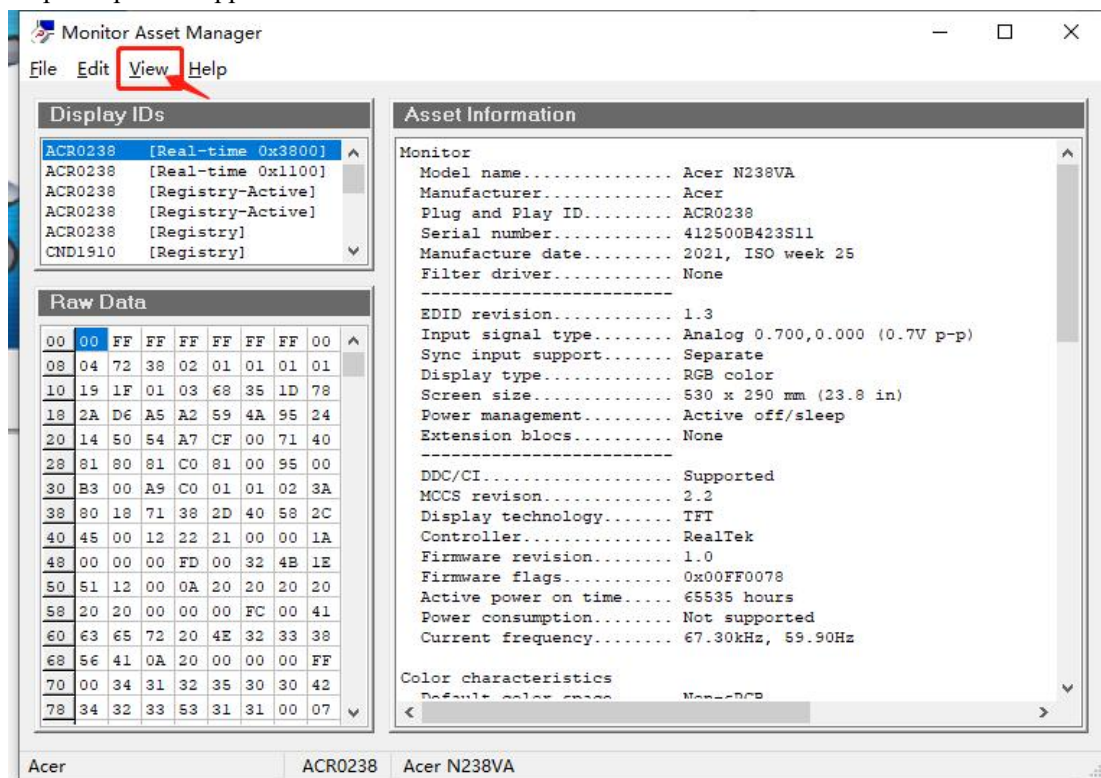

Wait for the green progress bar to finish, then the installation is complete.

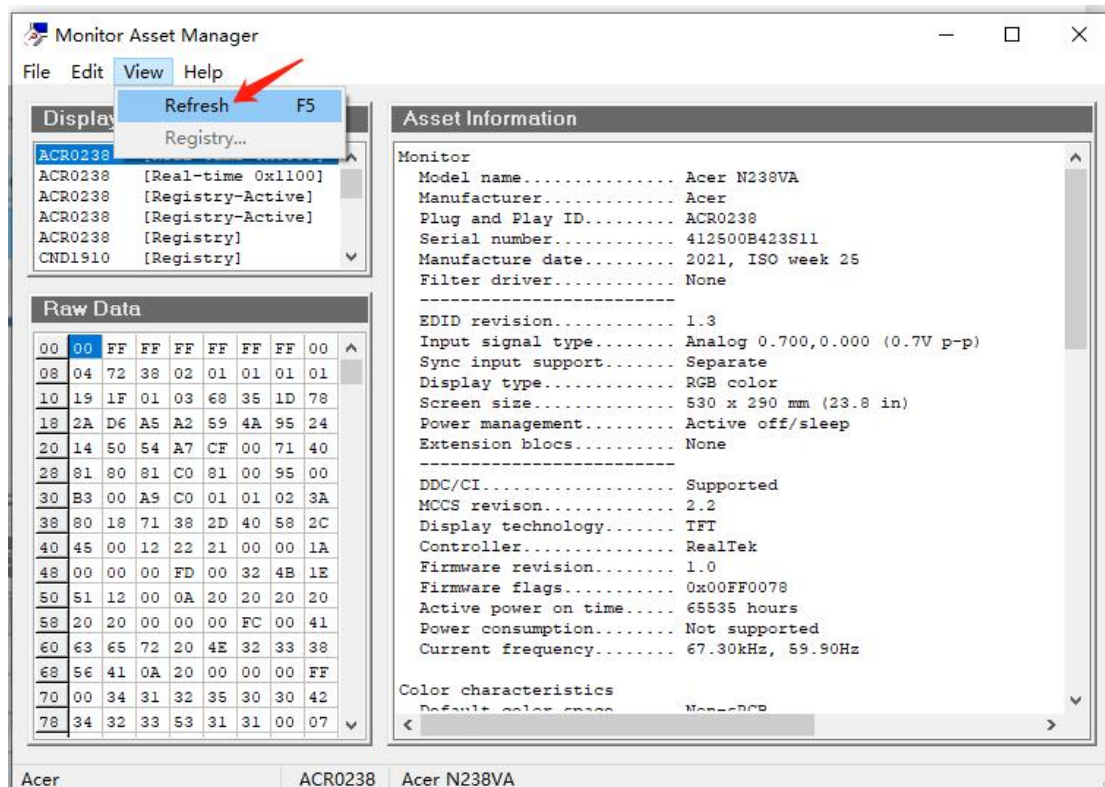

Complete installation

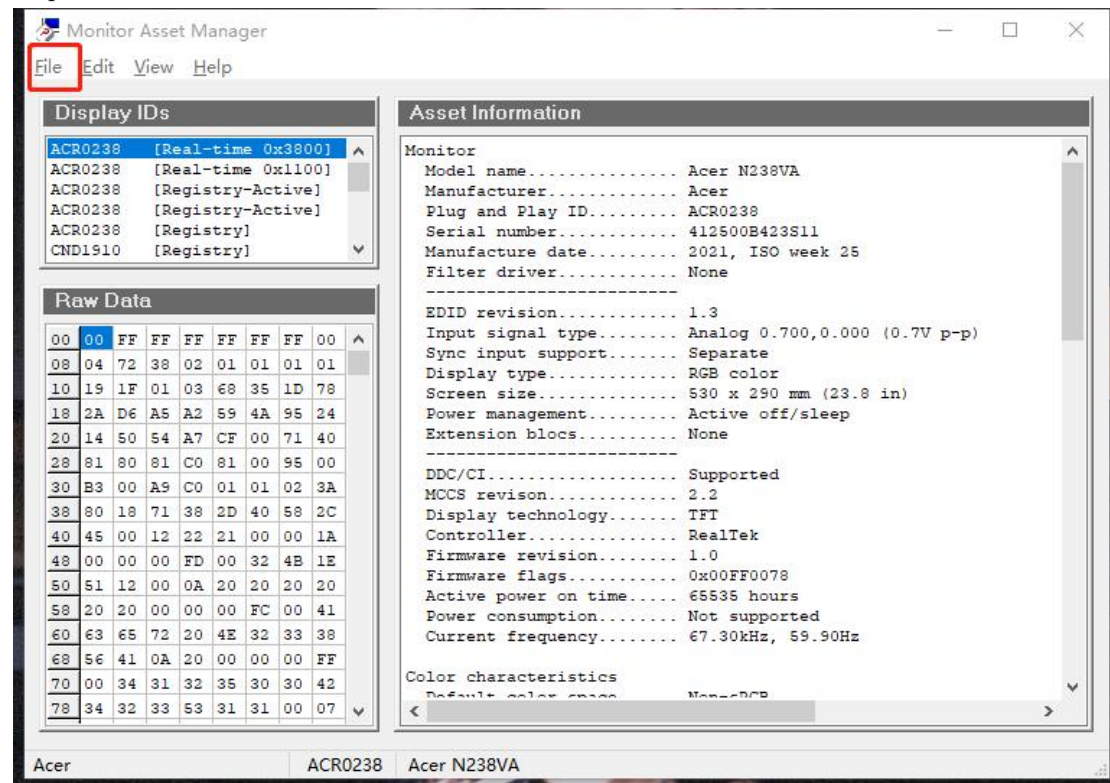

Step 3: Open the application and click on "View"

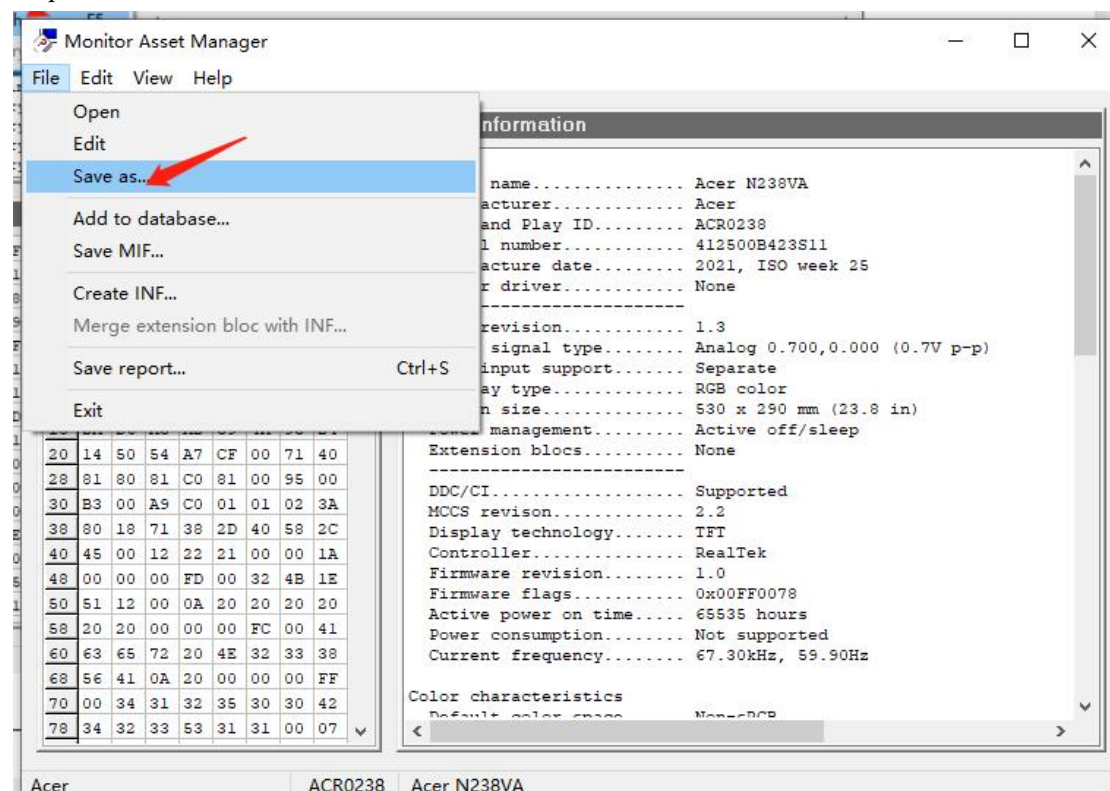

Step 4: Click on "Refresh" (wait a minute or so until the refresh is complete)

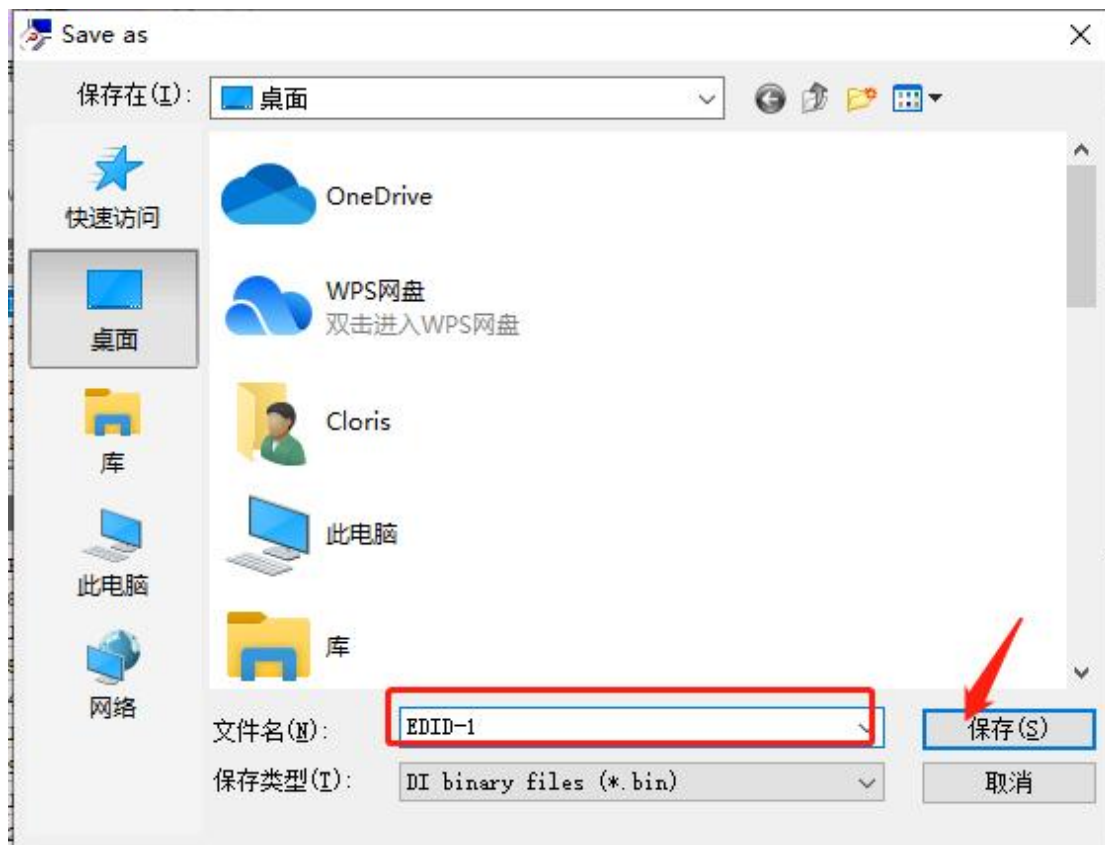

Step 5: Click on “File”

Step 6: Click “Save as” to save the file

Step 7: Please name the file "EDID-1" and save it.

Step 8: Please send us the "EDID-1.bin" file you have just saved.
