

Techconnect is a modular audio-visual faceplate family engineered especially for AV installers.

A “surround” fits to a backbox (or “mudring” if your wall is hollow), then the modules fix in place to complete the installation. Techconnect is based around standard UK backbox sizes, and Vision also offers mounting hardware for other countries.

For 99% of professional AV installations the same set of modules are required, so Vision offer a simple package that contains a basic selection of modules as a starting point. Just select the length of the cable package you need to go with it.
