

Fixes 10-34" displays to ceiling
Tilts to 90° for dentist ceilings
Swivel 30° left / 30° right
Telescopic pole 300 mm of adjustment
VESA size 100x100
Cable Management

Vision's ceiling mounts are both practical and versatile. Designed to stay discreet, the mount is white to blend seamlessly with the ceiling, while the black VESA plate matches the back of the display for a clean look.

Ideal for a reception area or retail space.

VESA

This mount is designed for flat panels which have holes up to 100 wide x 100 mm apart.

Telescopic

The telescopic pole allows you to effortlessly adjust the display to the perfect height.

Detachable Display

Vision understands installers only have two arms. The universal VESA bracket secures to the display on the ground, and the entire assembly easily hangs in place while the locking bolts are tightened.

Cable Management

The pole easily allows cables to drop down inside.

Tilt

The generous 90 degree tilt adjustment allows the display to be directed at the audience to avoid glare and optimise the viewing angle.

Applications

Ideal for business reception areas, doctors waiting rooms, dentist's ceilings, or to deliver digital signage in any retail environment.

Cathedral Ceiling

The ceiling fixture is designed to tilt, making it suitable for sloping ceilings. It can adjust up to 90 degrees to attach securely to the side of a ceiling joist.
