

Portable floorstand for displays up to 80 kg (176 lb)
 Fits displays with VESA sizes up to 800 x 600 mm
 For 47-100" Displays
 (subject to VESA pattern and weight limit)
 Motorised height adjustment
 Large 4" wheels
 Shelves included

Vision's Flat-Panel Mount (VFM) Carts are constructed from commercial-grade heavy-duty steel. They are easy for one person to move, and feature a motorised height adjustment. These attractive floorstands are perfect for AV rental, event centers, healthcare, schools, or any application where large format displays are shared between meeting areas.

SWL 80 kg (176 lb)

The robust steel frame supports displays weighing up to 80 kilograms.

Thumbscrews

The screws included to fix the display are thumbscrews for fast tool-free assembly. Vision include more screw sizes than other manufacturers to ensure you get that display on the wall as quickly as possible every time.

60-100" Displays

The recommended size range is also influenced by the weight of the display and the mounting hole dimensions. Any display weighing less than 80 kg and with a VESA pattern of up to 800 x 600 mm can fit this floor stand.

Big Wheels

Quality 4" (100 mm) castors glide over any bumps, making the cart easy to pull even on deep carpet. Big wheels also reduce vibration of your expensive AV equipment.

Adjustable Height

Motorised height adjustment of 537 mm (21"), controlled by a simple up/down control panel fixed to the laptop shelf.

Shelves Included

Two shelves come with the cart; one for a video conference camera above the display, and another below the display for laptops etc. Both are height adjustable.

Wall Fixing

The column can be securely fixed to a wall using the included brackets. This feature offers the flexibility to mount the stand on a wall for a space-saving and permanent installation if desired.

Increased Safety

If there is obstruction under the display as it is lowered, the weight of the display simply rests on top of the obstruction. It does not pull down and crush the obstruction. There is safety sensor which sensors obstacles and will stop the motor.

SPECIFICATIONS

PRODUCT DIMENSIONS

1383 x 682 x 1263-1800 mm / 55" x 27" x 50-71" (width x depth x height)

PACKAGED DIMENSIONS

1175 x 490 x 200 mm / 46.26" x 19.29" x 7.87" (length x width x height)

PRODUCT WEIGHT

37.9 kg (83.56 lbs)

PACKAGED WEIGHT

39.3 kg (86.64 lbs)

SAFE WORKING LOAD (SWL)

80 kg (176 lbs)

SHELF SAFE WORKING LOAD

5 kg (11 lbs)
