

VISION SERIES X

VFM-F26 Height-Adjustable Professional Display Cart 80kg

Vision's F26 cart replaces the best-selling F25 with an even stronger and more rigid structure. The height-adjusting hand crank features a completely redesigned mechanism that is easier to operate and more reliable. Like all Vision products, it includes all necessary components and comes with an unbeatable lifetime warranty.

These attractive floor stands are ideal for AV rentals, event centres, meeting room facilities, schools, or any setting where large format displays are used across various meeting areas.

- Portable floor stand for displays up to 80 kg
- Fits displays with VESA sizes up to 800 x 600 mm
- For 55-100" Displays (dependant on VESA pattern and weight limit)
- Height adjustable by hand crank
- Large 4" wheels
- Extra wide video bar shelf

Features

SWL 80 KG (176 LBS)

The sturdy steel frame can support displays that weigh up to 80 kilograms. For heavier displays choose the VFM-F27.

55-100" DISPLAYS

The suitability of a stand is also determined by the weight of the display and the dimensions of the mounting points. Displays that weigh under 80 kg and have a VESA pattern up to 800 x 600 mm are compatible with this stand.

LARGE 4" WHEELS

The 4-inch (100 mm) casters ensure the cart glides easily over thick carpet and minimizes vibration to sensitive electronic equipment. All four wheels can be locked.

ADJUSTABLE HEIGHT

Turn the crank handle located at the side of the column to adjust the display height by 400 mm (16 inches).

TILT

The VESA mount is adjustable and can be tilted downwards to prevent reflections from overhead lighting.

CAMERA SHELF

The cart includes a small top shelf for a video conference camera above the display. Both shelves are height adjustable.

MINI PC MOUNT

VESA100 mounting holes and M4 stand-offs are provided, allowing for attachment of a mini-PC, such as a Dell Optiplex or Intel NUC, to the VESA mount behind the display.

CABLE MANAGEMENT

Vision considers every detail! Included are stick-on cable clips that allow for discreet cable routing up the column.

CONFERENCE BAR SHELF

The generous bottom shelf, measuring 800 mm (32 inches) in width and 250 mm (10 inches) in depth, is designed to accommodate Teams or Zoom video bars beneath the display. It can also serve as a convenient place for laptops.

FEET INCLUDED

To convert the F26 into a non-portable floor stand fit the included feet, instead of the wheels.
