

Double-articulated wall mount for flat panels that ranges from 42" to 70"

Sturdy 2.5 mm thick rolled steel

Reaches 55-356 mm (2.2-14.0")

Vision's **Vision Flat-Panel Mount - Wall Arm** range is tough and flexible. The VFM-WA6X4B fits any flat-panel LCD or LED screen which has rear mounting holes up to 600 x 400 mm apart.

Up to 70"

Most larger displays use VESA arrangement of mounting points up to 600 x 400 mm apart, so the WA6X4 fits the majority of displays up to this size. Note: if a larger display has the correct mounting points and weighs less than the SWL this mount can support it safely.

Safe Working Load

The strong mechanical design has a "safe working load" of 20 kg (44.1 lbs).

Rotation

Didn't fix the wall plate perfectly plumb? No problem! 6° of rotation allow you to get the display level easily once the display is in place.

Tilt and Swivel

-2-12° tilt and 90° swivel. Use this mount to fix a display in a corner up high in a waiting room, or fix displays around an office or in meeting rooms.

VESA

The VESA system defines how far apart the mounting holes are on the back of your flat-panel. Holes 600 x 400 mm apart are known as VESA 600x400 and will suit this mount. This mount also covers all smaller VESA sizes.

Thumbscrews

Thumbscrews are used to fix the display to help speed up the installation of this mount.
