

Works with Vision's professional wall mounts and floorstands

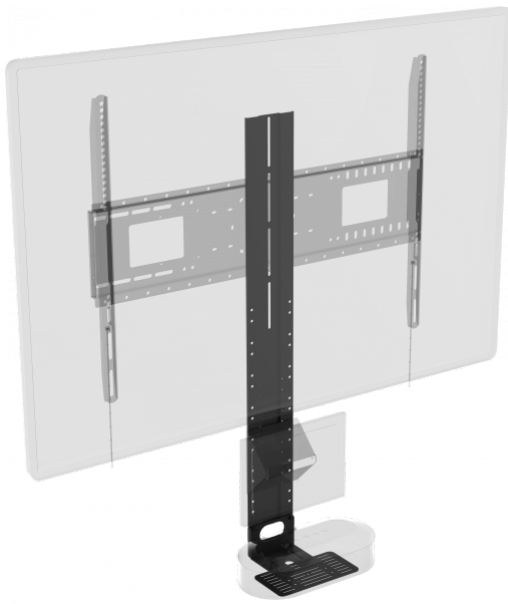

Highly adjustable

Can fix directly to wall

Platform 216 x 120 mm (8.5"x 4.4")

Use to hide Clickshare behind display

VESA100 holes for fixing media players behind display

This video conference camera shelf fits to Vision's professional flat-panel wall mounts. It fixes to the horizontal part of Vision's wall mounts to provide a shelf for video conference cameras and other devices above or below the display.

Adjustable Depth

The shelf can be fixed at different depths, or left off it not required.

Compatibility

Works with these Vision mounts:

VFM-W4X4

VFM-W4X4T

VFM-W4X6

VFM-W6X4

VFM-W6X4T

VFM-W8X6

VFM-W8X6T

VFM-W10X6

VFM-F10

VFM-F30 (all variations)

VFM-F40 (all variations)

VFM-F50 (all variations)

Alternative Fixing

The shelf can be fixed directly to the wall if that suits the job better.

Height Adjustable

The vertical part fixes to the wall mount at various heights.

Above or Below

Mount the shelf above or below the display as required.

iPad Enclosure

VESA 100x100 mounting points on the column allow an iPad enclosure like Heckler's Zoom Room iPad enclosure to be fixed below the display.

Screen Size 50"+

The vertical column is 1003 mm (39.5") tall, so this is not appropriate for screens smaller than 50".

Logitech Rally or Meetup

The shelf accommodates Logitech's Rally Camera. It has a fixing hole so the camera can be fixed to the shelf. Or the wall bracket that comes with Logitech's Meetup can fix to the vertical column.

Hide Clickshare Behind Display

Designed to accommodate Barco's Clickshare CSE-100, CSE-200, CSE-200+, and CX-50 base stations. These items can sit on shelf visible to users, or a crossbar is included to mount these receivers behind the display out of sight.

Yamaha YVC-1000 Shelf

The shelf has fixing holes for the YVC-1000 audio conference base unit.

Universal Shelf

Any video conference camera can sit on this shelf.

VESA100 mounting holes on column

An array of holes in the column allow media players to be fixed behind the display, out of sight.
