This 8th Generation Vision Media Player is packed with the latest Intel® Iris® Plus graphics card which adds better clarity, letting you see data visualizations or onscreen text in brilliant definition. The high 60Hz refresh rate makes every movement on the screen crisp and smooth.

Connect up to three 4K displays simultaneously, all running different content. Video is output by the full-sized HDMI connector, or the new Type-C USB connector. Also known as USB 3.1, this new USB connector can carry DisplayPort 1.2 signal, or Thunderbolt™ 3 data signal which supports data transfer rates of up to 40 Gbps! That's four times as fast as the standard USB-C data transfer rate.

A wireless card comes built in which supports the latest Bluetooth and Wifi standards, and the front power button has a multi-coloured LED ring so you can personalize the look.

If you choose to run Windows 10 the new microphone array built into the front panel makes it easy to leverage voice control with Cortana. The future of digital signage where viewers can interact with the content by voice is here.

Windows®

Choose from any Windows or Linux operating systems, or simply order it with none if you'd prefer to load your own image.

Memory

Vision only use high quality components from premium brands. Choose from 4GB, 8GB, 16GB, and 32GB.

SSD

This Vision Media Player has one M.2 connector to accept the latest, fastest, and smallest solid-state hard drives (SSD). It supports 22x42 or 22x80 M.2 SSD.

Signagelive

Vision's offers one of the most popular digital signage software solutions pre-loaded.

Signagelive can be installed so that when turned on the device goes straight into player mode.

Wifi and Bluetooth

Comes with Intel® Dual Band - AC 9560 wireless adaptor which supports 802.11ac and Dual Mode Bluetooth 5.0.
